

Warrior-T Activities Report

Developing Simple Ways to Train Complicated Things...

Volume I, Number 4 – 9 December 2002

Chief's Comments

Warrior-T continues to be busy learning its trade and working to provide training products for the great soldiers in our digital units... it is a great and exciting arena to be in right now.

These past two weeks have seen members of Warrior-T coordinating with various digital proponents and observing 3/2 SBCT's battalion EXEVALs at Fort Lewis. We continue to work hard collecting and integrating all the ABCS digital systems knowledge in our Army to turn it into useable training products for the soldiers and battle staffs of digital units. Collaboration is the key to success in this endeavor. I ask any organization, unit or individual that has any information on the use of digital systems to share it with others, in particular, the training development community. We want to exploit this knowledge and skills as we train digital system operators and integrators, current and future.

The Holiday Season sees Warrior-T supporting various Operation Enduring Freedom requirements, so we are feeling the high OPTEMPO along with the rest of the Army. We hope that everyone takes the time during the season to think about why we do what we do – family, country and the American way of life...

Techniques and Procedures:

POCs: MAJ Healy or Mr. Manson

♦ Warrior-T is staffing an initial collaborative listing of ABCS training development products being developed throughout the digital community. You can expect to see this listing in the next Warrior-T Activities Report (23 Dec 02).

♦ Warrior-T has been added to AKO's Knowledge Collaboration Center where we will begin posting ABCS Digital Training projects under development. Warrior-T's site is found in AKO's collaboration tab under TRADOC.

♦ Warrior-T's website is also now linked through the Fort Gordon University of Information and Technology (UIT) at <https://uit.gordon.army.mil> by logging in through the AKO website, selecting "FORUMS" and then "University Café". The first of many new Warrior-T links!

Techniques and Procedures (T&P) Manual:

Work continues on development of the Blue Picture Module of the T&P Manual for use by unit's and staff officers and NCOs during tactical operations and SOP development. The modules are being created following collection of field observations from unit training events and development of ABCS-specific expertise within the Warrior-T staff. The first sub-modules will be the JMTK Task Bar Menu and Tactically Oriented Map Views.

Digital Dictionary: Warrior-T is finalizing a digital dictionary that identifies and defines the critical words, phrases, acronyms, and abbreviations used in the ABCS digital environment.

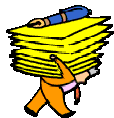

Refer to the Brigade TTP series page at the Warrior-T web site ([Products page](#)) for other related products and a more detailed explanation of the overall Techniques and Procedures methodology and projected publication dates. **POC MAJ Healy.**

Warrior-T Activities Report

Developing Simple Ways to Train Complicated Things...

Volume I, Number 4 – 9 December 2002

Tasks:

POCs: MAJ Collins or Mr. Teal.

ST 20-101-5-ABCS, Digital Brigade Battle Staff Collective Tasks: Warrior-T is working with the BCTC to update the Brigade Battle Staff Special Text and Task.

Division Battle Staff Training Support Package: Warrior-T is working with CAC and DSCT-W to select the critical digital division staff tasks upon which the Division Battle Staff Training Support Package and the Corps and Division MTPs will be based. The Battle Staff Task Matrix has been completed and forwarded to Fort Leavenworth for review.

Task Product Update: ST 20-101-5-ABCS-CORE-TASKS, 27 November 2002 has been commandant approved by the Infantry School. Additionally, this edition of the product now contains the FBCB2 version 3.5 tasks. The product can be found on the left side of the Warrior-T home page or on the Products/Handbooks web page of the Warrior-T website.

Warrior-T Support:

POCs: Mr. Parker and Mr. Crandell.

ASAT Database: The Warrior-T ASAT database is being cleaned up in anticipation of the ATIA-M migration. More details will be provided when the ATIA-M is approved.

Web-site Task Map: Warrior-T is enhancing its web-site task map viewer's capabilities. Suggestions are welcome.

Techniques and Procedures (T&P) Manual Enhancements: The Support Branch is also

developing the HTML templates and a web-based user interface for the T&P series.

Battlefield Operating Systems:

Fort Lewis Visit: Members of Warrior-T are currently observing and collecting SBCT TOC techniques and procedures (T&P), inter-TOC and TAC digital communications T&P, and SBCT TOC to BN TOC digital communications T&P during 1-32 IN's EXEVAL (4-10 Dec 02) at Ft. Lewis. The next Warrior-T Activities Report (23 Dec) will have details. **POC: MAJ Healy.**

ABCS Systems:

Signal: Warrior-T's signal contingent is currently attending the 30th Annual Signal Symposium at Fort Gordon, Georgia. **POC: MAJ Collins and Mr. Perrault.**

Your feedback on the value of the contents of the Warrior-T Activities Report is greatly appreciated. Comments may be sent directly to [Mr. Gary McMillan](#) or [MAJ Steve Williamson](#)
